IN

A DISTANT ERA

Distant Era creates fine art and portrait photographs of people and places from imagined pasts, possible futures, and magical realities.

In collaboration with other artists, we evoke these distant eras with theatrical costume and makeup, evocative scenery, and deliberate lighting, and we enhance them with contemporary tools to cast these captured moments in the light of long ago or far away.

We long to walk the lion-decorated streets of Babylon, to visit alien worlds aboard an interstellar vessel, and to observe the native dances of elves. Our images are windows to speculative realities and postcards from the past. They are consolation for fellow time travelers who long to look beyond the familiar scenery of the present and gaze upon the people and places of a distant era.

You are what you dream.
